

# FAU hosts 'ground greening' event for College of Engineering's new building

Florida Atlantic University (FAU) recently celebrated the official "ground greening" of the College of Engineering and Computer Science's Engineering I building.

Being environmentally conscious was the theme of the day's event. Hard hats, green shovels and bags of dirt were provided for awaiting dignitaries, but no digging took place.

The Engineering I building project is registered with the U.S. Green Building Council with a university' commitment to achieve Leadership in Energy and Environmental Design (LEED) Platinum Certification, the highest level of LEED certification possible.

The LEED certification ensures the building is energy-efficient, uses innovative technologies and offers users a clean, healthy interior environment.
